PRIME GUARD

STEEL AND CONCRETE PROTECTIVE COATING SYSTEM

system
1320

PRIME GUARD 1320 is a two coat high-solids polyamide epoxy coating system especially formulated to protect steel and concrete structures from corrosion. 1320 resists salt water, chemicals, and abrasion, and performs well at lower temperatures.

COMMON APPLICATIONS

1320 is typically spray-applied to structural concrete and steel to achieve proper thickness. Specific applications include, but are not limited to: pulp and paper, chemical processing and fertilizer plants, refineries, secondary containment, sewage and waste treatment. For tanks and pools use two coats of 106 instead of one coat of 105 and one coat of 106.

COMPONENTS

105 / 106

LEED MATRIX [NC 2009]

	YES	NO
MRc1.1 Building Reuse	✓	
MRc2 Construction Waste Management	✓	
MRc4.1 Recycled Content		✓
MRc6 Rapidly Renewable Materials		✓
IEQc4.2 Low Emitting Materials		✓

OPTIONS

Cove Bases: Not Available

Colors: see back panel

	A	B	C
Texture	✓		

Prime Coat offers 3 categories of finish Textures. Texture A is our smoothest finish. Texture B is our mid-level slip resistant finish and Texture C is our highest level slip resistant finish. Custom textures can be engineered to meet specific design requirements. A mock up is recommended as the best way to ensure customer satisfaction.

Antimicrobial: Available

Topcoats:

509

Aliphatic urethane, superior chemical and abrasion resistance, great color retention, solvent based
