PRIME CAST

SOLID COLORED MEDIUM DUTY URETHANE
TRAFFIC SYSTEM

system
4614

PRIME CAST 4614 provides the same benefits as the 4613 but includes additional thickness to handle heavier traffic usage and weight. It is a high solids urethane elastomeric parking system designed to protect concrete parking structures from damage caused from road salts, oil and moisture run off. Protecting the structural integrity of concrete is the most cost effective way of increasing the service life of the structure and reducing life-cycle costs.

COMMON APPLICATIONS

4613 is typically installed over clean prepared concrete where moderate vehicle traffic is expected and surface flexibility is required. Specific applications include, but are not limited to: Corporate Parking Structures, Mall and shopping center parking structures.
